PROFILE SUMMARY

AI undergraduate skilled in NLP, Computer Vision, and real-world data processing. Experienced with Python, Transformers, and ML tools, with leadership experience in large-scale event management.

PROJECT EXPERIENCE

Fact-Based Judgment Outcome Prediction (Ongoing) | NLP, Transformers

- Built model using BERT (HuggingFace)
- Used pandas & sklearn for preprocessing and evaluation
- Improving accuracy via tuning

YouTube Video Summarizer

- NLP-based summarization using preprocessing techniques

Focus Tracker Web App

- OpenCV-based real-time monitoring system

Student Performance Prediction

- ML model using pandas & sklearn

TECHNICAL SKILLS

Programming	Python, C/C++
AI/ML	NLP, Computer Vision, Supervised Learning
Libraries	Transformers, pandas, NumPy, sklearn, OpenCV, Flask
Web	HTML, CSS, JavaScript
Tools	Git, GitHub

LEADERSHIP EXPERIENCE

Co-Lead — Metaversity Club (Event Management)

Organizing Member — Health Hack Hackathon (International)

Organizing Member — IHEF

Committee Member — Advitya 2026

EDUCATION

VIT Bhopal — Integrated M.Tech in AI (2nd Year)
